

PETROLEUM TRAILERS

DOT-406

NW PETROLEUM TRANSPORT
105,500 GVW

It was 1949 when Beall, the pioneers of the truck and trailer manufacturing, built the first aluminum truck tank and pull trailer. More than 50 years of experience later, we're still leading the way to give our customers the best and lightest units possible. With our 24' CAD-assisted roll, aluminum router, and custom-built head press, Beall can design and build a unit to fulfill your specific operational needs.
