Industry-leading barrel design

Several models to choose from

Ready for service immediately

LED lighting - dual function ID light

Great clean-out and easy operation

✓ 100% factory assembled

PNEUMATIC DOUBLES 710 - 775

DRY BULK

710 DOUBLES

With a capacity of 710 cubic feet, this semi and pull trailer powder train is the big brother to Beall's very successful 550. Manufactured using state-of-the-art equipment to our exacting standards, our pneumatic trailers boast the best maintenance history in the industry. These trailers have become the proven workhorses to haul a variety of bulk products.

775 DOUBLES

For increased capacity when hauling cement products in demanding high gross weight states, choose the 775 Pneumatic. Ready to roll when they leave our floor, these doubles make light work of large jobs. Beall's benchmark single-hopper design with no internal ribs is constructed of all aluminum. Every unit is buffed to a shine that will turn heads on the highway and off.

A LEGACY OF QUALITY
